RANDOLPH

Four Cases of Smallpox Have Developed in Braintree.

There have developed four cases of smallpox at Braintree, the result, it is thought, of Miss Batchelder being exposed by the woman who went to Essex Junction April 12. Miss Batchelder, a teacher in Brookfield, went to her home after riding with her, and then to her school, but later developed the disease and went to Northfield and took the train for Braintree, where she lived, thus exposing many others. Two others of her family are now down with the same disease and many in the different places are exposed to it. Fifty people have been vaccinated by Dr. C. J. Rumrill of this place and others by the local physicians, and a quarantine has been placed upon those who were thought unsafe to be about their business, so it is hoped that it will not spread any further.

The funeral of the late Mrs. Homer Terrien was held at the Catholic church on Tuesday morning at 9 o'clock, and interment was made in the Catholic cemetery. On the afternoon of the same day, at 1 o'clock, the funeral of the late Joseph Brown was held at his home on Park street, Rev. Fraser Metzger officiating, and interment was in the family lot in Southview cemetery. Among those from out of town were Mrs. James Mulhally of Montpelier and her family.

Martin Tewksbury, for many years a very prominent business man in town, was stricken with a shock of paralysis on Monday and now lies in an unconscious state at his home on South Main street, in the care of the trained nurse, Miss Judd. Mr. Tewksbury had been quite well and able to attend to business all winter, and Sunday attended Bethany church, and Monday morning, although not quite like himself, wanted to go to the store. In a short time he evidently sustained a slight shock, which has steadily developed till this time, when his case is considered very serious.

B. P. Spear of Medford, Mass., has come to pass the summer with his niece, Mrs. Ida Wrake, who resides at Braintree.

Miss Marion Bullard, the new matron of the sanatorium, is expected in town next Monday and will at once assume her duties.

Mrs. J. B. Eldredge, who came this week to visit her sister, Mrs. B. H. Davis, and also to see her mother, Mrs. McLaughlin, returned to her home in Waterbury Tuesday.

City Eye Specialists Tell How To Strengthen Eyesight 50% In a Week's Time In Many Instances

A Free Prescription You Can Have Filled and Use at Home.

Boston, Mass.—Victims of eye strain and other eye weaknesses, and those who wear glasses, will be glad to know that Doctors and Eye Specialists now agree there is real hope and help for them. Many whose eyes were failing say they have had their eyes restored and many who once wore glasses say they have thrown them away. One man says, after using it: "I was almost blind. Could not see to read at all. Now I can read everything without my glasses, and my eyes do not hurt any more. At night they would pain dreadfully. Now they feel fine all the time. It was like a miracle to me."

A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything seems clear. I can read even fine print without glasses." Another who used it says: "I was bothered with eye strain caused by overwork, tired eyes which induced fierce headaches. I have worn glasses for several years, both for distance and work, and without them I could not read my own name on an envelope or the typewriting on the machine before me. I can do both now, and have discarded my long distance glasses altogether. I can count the fluttering leaves on the trees across the street now, which for several years have looked like a dim green blur to me. I cannot express my joy at what it has done for me."

It is believed that thousands who wear glasses can now discard them in a reasonable time, and multitudes more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses.

Dr. Beck, an eye specialist of nearly twenty years practice, says: "A patient came to me who was suffering from Biphthalmia Marginalis with all the concomitant symptoms, as morning agglutination of the lids, chronic conjunctivitis and epiphora. Her eyes when not congested had the dull, suffused expression common to such cases. Having run out of her medicine a friend suggested Bon-Opto. She used this treatment and not only overcame her distressing condition, but strange and amazing as it may seem, so strengthened her eyesight that she was able to dispense with her distance glasses and her headaches and neuralgia left her. In this instance I should say her eyesight was improved 100%."

I have since verified the efficacy of this treatment in a number of cases and have seen the eyesight improve from 25 to 75 per cent in a remarkably short time. I can say it works more quickly than any other remedy I have prescribed for the eyes."

Dr. Smith, an oculist of wide experience, says: "I have treated in private practice a number of serious ophthalmic diseases with Bon-Opto and am able to report ultimate recovery in both acute and chronic cases. Mr. B. came to my office suffering with an infected eye. The condition was so serious that an operation for enucleation seemed imperative. Before resorting to the operative treatment I prescribed Bon-Opto and in 24 hours the secretion had lessened, inflammatory symptoms began to subside, and in seven days the eye was cured and retained its normal vision. Another case of extreme conjunctivitis with inflamed eyes escaped the surgeon's knife by the timely use of your collyrium. The patient's external muscles yielded to the soothing and anodyne effects of Bon-Opto. I always instill Bon-Opto after removal of foreign bodies and apply it locally to all burns, ulcers and spots on the eyeball or the lids for the relief of irritation. By clearing the lids of secretions and acting as a tonic for the eyeball itself, the vision is rendered more acute, hence the number of cases of discarded glasses."
